Skills

Frontend architecture design

Technical SEO

Web performance optimization

Agile Mindset

Code quality and monitoring

User research A/B testing

Work Experience

Senior Software Engineer, Gartner

Oct. 2021 - Dec. 2025

Accelerated Getapp.com with Next.js implementing server-side rendering optimizations, modular React components, and performance enhancements.

SEO strategy implementations sitemaps, structured data markup, and CWV optimization, directly improving organic search visibility and user experience metrics.

Collaborated cross-functionally on code reviews, technical specifications, and user research to deliver data-driven features

Front End Developer, Nimble.la

Sep. 2018 - Aug. 2021

Update.AI (Desktop Application & Dashboard):

Architected and developed an Electron application using TypeScript, integrated as a plugin for a major video conferencing provider to capture real-time audio streams. Led the implementation of the insights dashboard, building a high-performance interface to visualize meeting transcriptions, generate AI-powered summaries, and display actionable insights.

Hibu (Mobile Application):

Built the initial React Native application from scratch, allowing users to access the digital marketing platform's data on mobile devices. Handled the entire deployment process, successfully launching the app on both the Apple App Store and Google Play Store.

Education

Degree in Engineering Information Systems at National Technological University ("Universidad Tecnológica Nacional" - UTN) – Rosario, Argentina
