Professional Summary

Senior Software Engineer with 7+ years of experience building high-performance web applications. Deep expertise in React, Next.js, TypeScript, and frontend architecture in production front-end applications. Proven track record in web performance optimization, technical SEO, cross-functional collaboration, and delivering data-driven features. Passionate about leveraging AI to automate workflows and enhance user experience.

Technical Skills

Frontend: JavaScript (ES6+), TypeScript, HTML5, CSS3, React, Next.js, Server-Side Rendering (SSR), Static Site Generation (SSG), Streaming UI, Client state management libraries (Redux, Zustand), Zod, Tailwind CSS, SASS, Flexbox, Responsive Design, shadcn/ui, Vite, Jest, Vitest, React Testing Library, Percy
AI & LLM Integration: OpenAI API, Anthropic, Hugging Face, LangChain, Generative AI, Large Language Models (LLM), LLM Integration, Prompt Engineering, AI Agents, AI-Powered Automation, Retrieval-Augmented Generation (RAG), Pinecone
Backend & Infrastructure: Node.js, Python, REST APIs, GraphQL, tRPC, Kafka, SQS, Redis, PostgreSQL, S3, Docker, Monorepo (npm workspaces), Microfrontends, Git, GitHub, GitHub Actions, CI/CD, AWS, Vercel, Cloudflare
Performance & Quality: Web Performance Optimization, Core Web Vitals (CWV), Lighthouse, React Profiler, DevTools, Code Splitting, Bundle Optimization, Accessibility (WCAG), Technical SEO, A/B Testing
Tools: Agile, Jira, Code Reviews, Technical Specifications, Cross-Functional Collaboration, Slack, Datadog, Cursor, Claude Code

Work Experience

Software Engineer | Consultant — Present
Small Businesses

- Consulted on frontend architecture, performance, and full-stack delivery. Close partnership with clients to best fit the solution to their needs.
- Delivered end-to-end features integrating third-party APIs, CMS platforms, and automated notification systems.

Senior Software Engineer | Gartner Oct 2021 – Dec 2025
Getapp.com

Owned frontend architecture for a B2B software discovery platform serving high-traffic organic search, using **React, Next.js, and GraphQL**. My responsibilities included:

- Partnering with design to implement and maintain a custom **SASS design system**, documented and tested in **Storybook**
- Drove technical **SEO** and **web performance** fixing structural issues that were penalizing organic traffic
- Proactively working with product on rapid experimentation (**LaunchDarkly A/B testing**), proposing high-impact, low-effort technical improvements aligned with business goals.
- Experimented with **LLM integration** and **generative AI** review summaries as part of the organic growth strategy.
- Applied **testing practices** with **Jest** and **Cypress** (end-to-end)

Other relevant projects I was involved in:

- Delivered an AI chatbot proof-of-concept from product ideation to full demo rollout. Built a Retrieval-Augmented Generation (**RAG**) using **OpenAI** API, **Pinecone** vector database, and **LangChain/LangGraph** for orchestration, **Vite** frontend interface styled in **Tailwind Css** and Backend in **Python.** Deployed **docker** containers in **AWS EC2**
- Partnered with marketing to build a system consolidating customer profiles from multiple websites, enabling targeted campaigns for high-value users. Worked across the full stack with event-driven architecture **Kafka**, **SQS**, **Postgres SQL**, **Docker**, and CI/CD pipelines (GitHub Actions)

Front End Developer | Nimble.la Sep. 2018 - Aug. 2021

Startups

- Collaborated in cost-efficient MVPs to validate startup ideas in early stages, architecting **React** & **Typescript** front ends and integrating **REST APIs** within agile, **product-oriented** teams.
- Delivered multiple products across different domains in a fast-paced environment, iterating quickly while applying **good practices, testing, and scalability** principles to keep codebases maintainable.
- Gained experience with multiple client solutions: mobile hybrid apps, desktop applications, web applications

Education

Degree in Engineering Information Systems at National Technological University (“Universidad Tecnológica Nacional” - UTN) – Rosario, Argentina

Languages

- Spanish
- English - Cambridge First Certificate in English (FCE) CEFR **C1** level

Additional Information

- EU Citizenship (Italian) — eligible to work across the European Union
- Open to relocate
